	PLIERS	48-50

According to an ancient legend, Unicorn was regarded as a symbol of royal arms of Scotland and with meaning of precious and strong. Meanwhile, its horn is seen as a symbol of power. EMARK insists on supplying stable and durable safety hand tools in order to be your most reliable and trustworthy Partner.

HISTORY

ESTABLISHED

Started with Screwdrivers production.

1993

VPA/GS APPROVAL

Certified by VPA/GS from 1999.

1999

VDE 1000V CERTIFICATE APPROVAL

Certified insulated series since 2000.

2000

SGS

PASSED SGS INSPECTION

All series of products are passed the restricted substances inspection as safety and eco-friendly.

2007

2005

FIRST ONE IN THE WORLD

Slim type insulated S/D was launched.

2017

AUTOMATED PRODUCTION SYSTEM

Automated production implementation to expand production capacity.

2019

amfori BSCI
Trade with purpose

CERTIFIED BY BSCI

Implementing BSCI Code of Conduct which is set up based on ILO regulation for obligation of business to society.

EMARK
TOP QUALITY & SUPERIOR VALUE

BRAND IDENTITY INNOVATION

THE STORY AND SPIRIT OF EMARK

QUALITY/ PERSISTENT

EMARK tools have passed a number of international quality certificates, insist on producing durable product ,and is acknowledged in industry and market.We hold the spirit to provide high-quality hand tool and become trustworthy partner.

DEEP TILLAGE/ INHERITANCE

With more than 25 years manufacturing experience in professional hand-tool area, we still move forward with diligent and steadfast.Insisting on MIT localized production creates next extraordinary 25years, and deliver brand value permanently.

INNOVATION

From OEM to OBM, EMARK brand makes customer feel energetic power with innovative recognition, which injected new vitality in professional hand tool market.

INTERNATIONAL

In addition to running local market , we have developed overseas market channels to Thailand, Malaysia, Lebanon in Middle East and so on. Nowadays, we continuously expand global market distribution and grasp international trend preciously.

QUALITY CONTROL

RAW MATERIAL INPUT

Every lot of input of raw material should be inspected through composition analysis and taking record of all the data for study. So that we can have a definite standard to assure every lot of input meets with our Q.C request.

BLADES PROCESS INSPECTIONS

Tips : we check the tip size by DIN standard gauges. Measuring important point of sizes in thickness, width and length.

HEAT TREATMENT INSPECTIONS

Hardness Testing :

We test and control blades be heat treated by hardness allowance within HRC+/-1

Torque Testing :

With our standard chrome-Molybdenum steel blades. Generally we can control the torque over DIN standard more than 30%.

STRAIGHTENING

To ensure all blades are straight after heat treatment. We do straightening and testing at the same time and same machine.

PLATING INSPECTIONS

To ensure anti-corrosion after plating. We do Salt Spray Testing and also check appearance color of plating.

IMPACT TESTING

The testing is based on two conditions

1. Normal Temperature : $23^{\circ}\text{C} \pm 5^{\circ}\text{C}$,
 $H=W/P=2\text{FP}$
2. Low Temperature : $-25^{\circ}\text{C} \pm 3^{\circ}\text{C}$ stay in the fridge more than 2 hours, ($H=W/P=0.6\text{FP}$)
select 3 points of the blade to be impacted.

FINAL INSPECTIONS

After the blades are assembled with handle, we start to do final inspection before Packing and shipment out of our factory.

1. Checking straight line between blade and handle.
2. Ensure the handle is clean.
3. Magnetize all blades.

VDE INSPECTIONS

TESTING PROCESS

High Voltage Testing

"Quality Has No Compromise"
Especially for VDE 1000V insulated screwdrivers. We test our insulated screwdrivers piece by piece on our High Voltage Testing Machine. During the testing, the voltage must be 12000V-13000V.

Impact Testing

The testing is based on two conditions:
1. Normal Temperature : $23^{\circ}\text{C} \pm 5^{\circ}\text{C}$,
 $H=W/P=2\text{FP}$
2. Low Temperature : $-25^{\circ}\text{C} \pm 3^{\circ}\text{C}$ stay in the fridge more than 2 hours, ($H=W/P=0.6\text{FP}$) select 3 points of the blade to be impacted.

Fire Testing

The testing samples put on the fire with 3.7 Million joule/ m^2 10second then turn-off the fire. The height of burning can not over 120mm.

Pull Testing

Pulling insulated screwdrivers on the pulling machine with 50 Newton tester.

SPECIAL SLIM TYPE DESIGN

VDE INSULATED SCREWDRIVER

Features :

- Latest slim-type coating design, can use in confined area.
- Approved by 10000V High Voltage Resistance Test.

Caution :

- Keep insulated tools clean and dry.
- Please wear goggles at work for safety reason.
- Do not touch the non-insulated part without turning power off.
